

AMAR BAHADUR SINGH

SENIOR .NET TECHNICAL LEAD | SOLUTION ARCHITECT | ENGINEERING LEAD

BFSI | Payments | Insurance | Azure | Microservices | API Integration

Pune District, Maharashtra, India | +91 8467032124 | amarsinghbishen007@gmail.com | linkedin.com/in/amar-singh-bb302249

PROFESSIONAL SUMMARY

Senior Technical Lead with 14+ years of experience delivering enterprise-grade software across BFSI, Payments, and Insurance domains. Strong hands-on expertise in C#, .NET Core, ASP.NET Core, Web API, Microservices, RESTful APIs, SQL Server, and Microsoft Azure. Experienced in API-first architecture, legacy modernization, system integration, transaction processing, card issuing platforms, ISO 8583 transaction flows, PCI-DSS, authentication and encryption, CI/CD automation, and high-availability platforms. Proven experience leading development and QA delivery, guiding engineers, collaborating with cross-functional teams, and translating business requirements into scalable and secure technical solutions.

CORE COMPETENCIES

Technical Leadership & Engineering Delivery | Solution Architecture & API-First Architecture | Microservices & RESTful API Design | .NET Core / ASP.NET Core / C# Development

Azure Cloud & Cloud-Native Application Development | Legacy Application Modernization | BFSI, Payments, Cards & Insurance Technology | ISO 8583 & PCI DSS

Enterprise System Integration | CI/CD, DevOps & Release Automation | Performance Optimization & SQL Server | Team Leadership, Mentoring & Technical Guidance

TECHNICAL SKILLS

Languages: C#, VB.Net, C++, SQL, C, MQL4, Python

Frameworks: .NET Core, Web API, MVC

Architecture: Microservices, RESTful APIs, API-first Architecture, Clean Architecture, SOLID Principles

Cloud: Microsoft Azure: App Services, Azure Functions, Key Vault

Databases: SQL Server

DevOps & CI/CD: Jenkins, GitLab, TFS, TeamCity

Security & Payments: PCI DSS, JWT, OAuth2, ISO 8583

Tools: JIRA, HPQC, ServiceNow, SonarQube, GitHub Copilot, Power BI

PROFESSIONAL EXPERIENCE

ValueMomentum | Pune, India | **Tech Lead L2** | Jan 2026 – Present

- Lead development and QA delivery for insurance technology platforms, coordinating technical execution across cross-functional teams.
- Lead a .NET legacy modernization initiative, transforming the existing application into a modern React frontend and .NET Core backend/API architecture while retaining the existing MS SQL Server database.
- Own the end-to-end delivery lifecycle from requirements gathering and technical analysis through solution/architecture design, development, testing, deployment, and production release.
- Drive technical solution design and architectural decisions to ensure modernized applications are scalable, maintainable, secure, and aligned with enterprise standards.
- Coordinate business, engineering, QA, and deployment stakeholders to deliver modernization milestones.
- Leverage GitHub Copilot and Copilot Agent Mode to accelerate development, refactoring, code changes, and legacy-to-modern code transformation while maintaining engineering standards.
- Manage CI/CD deployment activities through TeamCity, including build, deployment, and release coordination across environments.
- Implement SonarQube-based code quality and static analysis checks as part of the development and delivery process.
- Translate business requirements into technical solutions, development tasks, and production-ready implementations.

Magnati – Subsidiary of First Abu Dhabi Bank | Abu Dhabi, UAE | **Technical Lead (Cards Issuing)** | Sep 2023 – Nov 2025

- Designed and developed ASP.NET Core Web APIs and Microservices supporting prepaid, salary, and virtual card platforms.
- Architected scalable backend services using .NET Core, Entity Framework Core, and SQL Server for enterprise payments workloads.

- Used Power BI to extract raw data from the Prepaid Cards database and generate operational reports and dashboards.
- Integrated RESTful APIs with Core Banking, FIRCO Screening, and First Vision systems to support end-to-end card and banking processes.
- Reduced transaction batch processing time to the Core Banking system by 30% through application and batch-processing optimization.
- Improved card onboarding speed by 25% by optimizing onboarding workflows and backend service processing.
- Led a team of 8 engineers, coordinating technical delivery and supporting 10 releases per quarter.
- Improved Salary processing for the Wage Protection System (WPS) by 300% through performance and processing-flow improvements.
- Implemented PCI DSS-compliant authentication, encryption, and secure data flows across card issuing solutions.
- Provided technical leadership through coding standards, low-level design, performance tuning, best practices, and engineering guidance.
- Served as SME for wallet onboarding and card lifecycle management.

Cognizant Overseas Solutions | *Abu Dhabi, UAE* | **Associate / Senior Software Engineer** | Oct 2016 – Aug 2023

- Developed backend services and REST APIs using .NET Core and C# for enterprise banking applications.
- Worked on transaction processing, batch jobs, clearing systems, and high-volume data processing workloads.
- Collaborated with QA, DevOps, and business teams to deliver integrated enterprise banking solutions.
- Optimized SQL queries and improved batch-processing performance through database and application-level tuning.

Chetu India Pvt. Ltd | *Noida, India* | **Software Engineer** | Oct 2015 – Sep 2016

- Designed and developed POS applications for Verifone and Ingenico payment devices using C++.
- Implemented ISO 8583 transaction flows including sale, refund, void, and balance inquiry.
- Worked on PIN encryption and EMV compliance systems, supporting secure payment transaction processing.
- Contributed to system integration, debugging, and performance optimization.

HPC Sphere Pvt. Ltd | *New Delhi, India* | **Senior Software Engineer** | Jul 2012 – Sep 2015

- Developed financial and forex trading applications using C++ and MetaTrader 4 (MT4).
- Implemented Monte Carlo Value at Risk (VAR) simulations and trading tools using MQL4.
- Developed reusable components and contributed to application performance improvements.

EDUCATION & CERTIFICATIONS

- Bachelor of Technology (B.Tech.) in Computer Science – Integral University, Lucknow
- Microsoft Certified: Azure Fundamentals (AZ-900) – Feb 2023
- Python Beginner Certification (Udemy) – Jul 2026
